Art Unit: 3728

Claim Objections

1. The claims are objected to because they include subject matter enclosed within parentheses. Current claim practice reserves the use of parentheses in claims for characters (usually drawing numerals) corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims. See MPEP § 608.01(m).

The parentheses around the word "sterilizable" in claim 1, line 5 should be removed

2. Claim 3 is objected to because "said" holder, line 3, is not defined in claim 1. It is believed "said" should be changed to --a-- holder in order to be in proper dependent form.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record teaches or suggests a sterilizable ventricular catheter having a proximal end and a distal segment having a plurality of drainage holes and a closed distal end formed with a slit, said slit being movable between a closed configuration and an open configuration, a sterilizable removable film tab inserted into the slit to prevent the edges of the slit from knitting together during sterilization and storage.

Conclusion

4. This application is in condition for allowance except for the following formal matters:
See paragraphs 1 & 2 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
